MDM AND SOFTWARE
Managing a small fleet of devices can take time, managing a large fleet can be an enormous job! As your device fleet grows, investing time into a management tool is essential. If you are challenged by the combination of institution owned and BYOD device management, talk to CR about the different management solutions available to your school.

PROFESSIONAL DEVELOPMENT
To fully realise the benefits of implementing any technology solution into the curriculum, you first need to plan and agree the desired outcomes. This needs to be supported with a robust program, designed to upskill your teachers and students to get the most from the technology chosen; making effective Professional Development (PD) an important link in the chain to achieving better learning outcomes. CR can structure a PD program designed to help you make the most of the opportunities technology in the classroom can create.
